

AMENDMENT TO THE SPECIFICATION

Please replace Paragraph [0033] with the following paragraph rewritten in amendment format:

[0033] With reference to FIGS. 1 and 2, funnel member 8 defines in off-set axial relation a relatively large inlet opening 10 adapted for attachment to a gas nozzle receptor 12 and a relatively small necked down outlet opening 22 adapted for attachment to inlet 28 of elongated tubular member 24. The off-set axial relation between the inlet opening 10 and outlet opening 22 causes fuel emerging from gas nozzle 6 to impinge on side ~~30~~ 50 of funnel member 8 and thereby causes fuel to spiral as the fuel proceeds forward to elongated tube member 24. Gas cap 14 screws directly into gas nozzle receptor 6. Filler neck 2 may optionally be provided with vent opening 27 for attachment to vent tube 25. Vent opening 27 may either be drilled in funnel member 8 after it drawn or it may be incorporated in the sheet stock before funnel member 8 is drawn.
